Green Data **For All** | INSPIRE Conference 2023 Programme

Session No. 1 | INSPIRE on the move!

28 November 2023, 09:00 – 10:30 CET

About this session:

To deliver on the objectives of the Green Deal, data is needed to make more informed and better decisions at all levels. The European Strategy for Data announces the development of common European Data Spaces in key sectors and domains of public interests, including a European Green Deal Data Space. Data spaces are digital environments that data providers, intermediaries, and users can access to share data. Data spaces ensure that more data becomes available in the economy and society but leaves the control in the hands of companies and individuals who generate the data. In this context, the Green Data for All initiative would update and further develop existing rules on the sharing of environmental geospatial data (the INSPIRE Directive) in support of the ambitions for a Green Deal Data Space and in line with more recent horizontal digital data initiatives and legislation. In this session the state of play of the GreenData4All impact assessment and the intermediate findings will be presented and discussed.

Topics covered:

Topic	Speakers
Green Data for All: Evaluation and possible revision of the INSPIRE Directive.	ENV - Joeri Robbrecht
Interaction with the audience - A survey to probe for expectations / needs	ENV
Science for policy brief – 'Beyond INSPIRE. Perspectives on the legal foundation of the European Green Deal Data Space	JRC
Novel approaches for Data Governance and Data Sharing within the Green Deal Data Space	JRC – Sara Thabit Gonzalez
Results of the survey	ENV

Moderators:

Joeri Robbrecht (ENV)
