

## Green Data For All | INSPIRE Conference 2023 Programme

### Session No. 10 | Workshop: A multidisciplinary perspective on common European Data Spaces

28 November 2023, 14:00 – 15:30 CET

#### About this session:

Based on the pillars and the favourable policy context defined by the EU's horizontal legislation for data sharing and the European strategy for data, this session will be focused on the multiple perspectives (scientific, policy, technical, organisational) that should converge in order to make the data spaces concept a success. Several specific topics will be presented and discussed, ranging from the empirical evidence for data sharing approaches of SMEs, the national perspective on data spaces, the scientific evidence in support of the establishment of data spaces as well as the infrastructure and enabling open source technologies. Interaction with the audience will be facilitated to have an enriching discussion through a panel discussion reinforced by an online poll and a question-and-answer discussion.

#### Topics covered:

Topic	Speakers
Introduction to the session. Science and policy context	Alex Kotsev and Marco Minghini (JRC)
A scientific perspective on the sharing and utilisation of data at scale	Marco Minghini and Alex Kotsev (JRC)
Digital Infrastructures and the role of GAIA-X	Jürgen Moßgraber and Phillip Hertweck (Fraunhofer IOSB)
Enabling Open Source technologies	Codrina Maria Ilie (Open Source Geospatial Foundation - OSGeo) – <i>online presentation</i>
Interoperability and user uptake – a SME perspective	Vlado Cetl (DIS4SME project)
Challenges and opportunities for the deployment of data spaces in the Netherlands.	Ine de Visser (Geonovum)

#### Moderators:

Marco Minghini (JRC), Alex Kotsev (JRC)
