Green Data **For All** | INSPIRE Conference 2023 Programme

Session No. 15 | Session: Statistics in support to the Green Deal

29 November 2023, 14:00 – 15:30 CET

About this session:

The session will share the knowledge developed in the networks of the National Statistical Institutes (NSI) and National Mapping & Cadastral Agencies (NMCAs) towards stronger implementation of geographical information together with statistical applications, supporting the European Green Deal and the digital transition. Presentations will touch upon several themes – from the European down to the national perspective.

Following the session, the attendances should get a good overview of the current state of play of Statistics and Geographic Information in support to the European Green Deal, the green twin, and understand how to approach the respective organisations for future collaboration.

Additionally, a set of issues (lessons learned) in implementing the European Green Deal will be identified from each presentation, and can be used as guidance for future developments in the European Statistical System (ESS) and geospatial agencies (e.g. mapping, cadastre, space, digital transition agencies).

Topics covered:

Topic	Speakers
UNGGIM Europe – SDG and the European Green Deal	UNGGIM EUrope
Statistics in support to the European Green Deal – the ESS perspective	Eurostat
Country perspective (Building Energy statistics)	CBS (NL)
Country perspective (Ecosystem accounting)	Statistics Estonia
Lessons learned	Eurostat

Moderator:

Hannes I. Reuter (ESTAT)

European Commission
