

Green Data **For All** | INSPIRE Conference 2023 Programme

Session No. 12 | Workshop: UN-GGIM: Europe contributing to European data strategy

28 November 2023, 09:00 – 10:30 CET

About this session:

Europe Region of the United Nations Committee of Experts on Global Geospatial Information Management (UN-GGIM: Europe) aims to maximise the use of geospatial information in Europe for a safer and more sustainable world. This matches the EU's ambitions for a society empowered by data, anchoring data as the basis for better decision making.

UN-GGIM: Europe works in collaboration with partners to recognise opportunities, understanding and solving common challenges across Europe. This session will explore how the work plan of UN-GGIM: Europe is supporting and implementation of European Green Deal and EU Common Data space policy through its focus on data integration, data from sustainable development, and the linkages of European policy with the Integrated Geospatial Information Framework (IGIF).

Short presentations from members of the UN-GGIM: Europe Executive Committee and Working Groups on this work, progress and findings will be followed by panel discussion and interaction with the audience.

Topics covered:

Topic	Speakers
Introduction to the session. Setting the context	Carol Agius (UN-GGIM: Europe)
UN-GGIM: Europe strategy – meeting the needs of Europe	Tomaž Petek (Surveying and Mapping Authority of Slovenia)
UN-GGIM: Europe - Policy and Data line of work	Ewa Surma (GUGiK)
Interlinking UNGGIM assets within the context of the emerging EU policy agenda on data sharing	Francesco Pignatelli (JRC)
Implementing UN-GGIM: Europe Core Data through the delivery of HVD in the OME2 project	Sallie Payne Snell (EuroGeographics)

Moderator:

Carol Agius (UN-GGIM: Europe)
